PROFILE

Software Engineer with 3 years of experience at Tech Mahindra supporting Cisco Systems. Experienced in SQL, Teradata, Informatica PowerCenter, Control-M, ETL support, data validation, and reporting. Skilled in writing optimized SQL queries, troubleshooting production issues, performing data quality validation, and supporting business reporting. Currently expanding expertise in Power BI, Python, Snowflake, and dbt to transition into modern data engineering and analytics roles.

SKILLS

- SQL(Joins, Subqueries, Aggregation, Query Optimization, Window functions, Stored procedures, CTEs)
- ETL & Data Warehousing Concepts
- Teradata
- Control-M(Job Scheduling & Monitoring)
- Informatica PowerCenter
- Python(NumPy, Pandas, Matplotlib)
- Excel(Pivot Tables, Data Cleaning, Lookups)
- Snowflake
- Power BI(Data Modeling, DAX, KPI Dashboards, Power Query, Conditional formatting, Slicers)
- Reporting and Data Visualization

PROFESSIONAL EXPERIENCE

Software Engineer

Tech Mahindra

Dec 2024 – Present

Hyderabad, India

Client: Cisco Systems

- Developed and optimized complex SQL queries using joins, subqueries, aggregations, and data validation techniques for enterprise reporting requirements.
- Analyzed large-scale business datasets to support reporting, operational analysis, and decision-making processes.
- Supported ETL workflows involving data extraction, transformation, and validation using Informatica PowerCenter and Teradata.
- Performed data quality checks and reconciliation activities to ensure data accuracy and reporting consistency across pipelines.
- Assisted in creating business reports and dashboard datasets for stakeholders and internal teams.
- Monitored and scheduled batch workflows using Control-M to ensure timely execution of critical data processes.
- Collaborated with cross-functional teams to identify reporting gaps and improve data delivery efficiency.

Associate Software Engineer

Tech Mahindra

Sep 2023 – Nov 2024

Hyderabad, India

- Supported SQL-based data extraction, reporting, and analysis activities for enterprise datasets.
- Assisted in ETL data validation and transformation processes across multiple reporting systems.
- Analyzed structured datasets to identify inconsistencies, trends, and reporting anomalies.
- Generated reports and validated outputs to support internal business operations and reporting requirements.
- Worked closely with senior team members to maintain data integrity and improve reporting accuracy.

PROJECTS

Superstore sales performance Dashboard | Power BI

- Designed and developed an interactive sales performance dashboard using Power BI on the Superstore dataset(~9000+ records).
- Built data models and created DAX measures for Total Sales, Total Profit, Profit Margin %, Total orders, and Avg Shipping Days.
- Implemented dynamic report title using SELECTEDVALUE() and filter context.
- Applied conditional formatting to highlight negative profit values for better business insights.
- Developed visualizations including Category-wise Sales, Region-wise Sales, Sub-category profit analysis, and Monthly Sales Trend.
- Enabled slicer-based filtering(Region, Year) for interactive business analysis.
- Structured report layout with KPI cards and optimized visual alignment for executive-level reporting.

EDUCATION

Bachelor of Engineering(B.E.)- Computer Science & Engineering
Chandigarh University

CGPA: 7.6 / 10

Jun 2019 – Jun 2023
Kharar, Punjab
